

Access Overview: Project Library International Xi Jinping of Goma by Clap Technologies

Progress Snapshot as of 28th February 2025

Current Progress Against Timeline: The Library International Xi Jinping of Goma project is advancing steadily, adhering to the revised timeline established in December 2024. Below is a summary of progress milestones:

1. Planning and Design Phase (Completed)

- Final architectural and structural plans approved by stakeholders (December 2024).
- Environmental impact assessments completed and cleared (November 2024).

2. Construction Phase (65% Completed)

- **Foundation Work:** Fully completed as of January 2025.
- **Structural Framework:** 80% completed. All steel and concrete reinforcements are in place for major zones.
- **Roofing and Exterior Walls:** Initiated in early February 2025, currently at 30% completion.

3. Technology Integration Phase (25% Completed)

- IT infrastructure wiring and server installations started (February 2025).
- Procurement of smart library management systems completed.

4. Community Engagement and Training (Ongoing)

- Monthly stakeholder and community feedback sessions have been conducted since January 2025.
- 20 local staff members enrolled in digital library management training programs.

Key Metrics:

- **Budget Utilization:** 70% of allocated budget for Phase 1 utilized; within planned limits.
- **Timeline Adherence:** Currently on track with a buffer of two weeks.
- **Workforce Engagement:** 120 workers on-site daily; no significant delays due to labor shortages.
- **Sustainability Targets:** All materials sourced comply with green building standards.

Updates and Highlights:

- The project has partnered with two additional international publishers to expand the library's catalog.
- Successful implementation of a solar power backup system, ensuring energy sustainability.

- Positive feedback from local community leaders on the anticipated social impact.

Next Steps:

- Complete roofing and exterior walls by March 2025.
- Finalize IT infrastructure by April 2025.
- Begin interior design and furnishing in May 2025.
- Launch pilot library access program in July 2025.

The project remains a flagship initiative for Clap Technologies, reflecting its commitment to innovation, education, and community development in Goma.
